

SPECIFICATION AMENDMENT

Please amend the paragraph beginning at page 10, line 24 of the Specification as follows:

Examples of soybean plant varieties provided by the invention and exhibiting a commercially significant yield in combination with high seed protein and protein plus oil are the soybean varieties 0007583 (deposited under ATCC Accession No. PTA-5764), 0008079 (deposited under ATCC Accession No. PTA-7601), 0137335 (deposited under ATCC Accession No. PTA-8110), 0137472, 0137441 and 0137810. One aspect of the current invention is thus directed to plants and parts thereof of these varieties and methods for using these plants and plant parts. Plant parts of these varieties include, but are not limited to, pollen, an ovule and a cell. Still further, the invention provides tissue cultures of regenerable cells of these varieties, which cultures regenerate soybean plants capable of expressing all the physiological and morphological characteristics of the variety. Such regenerable cells may include embryos, meristematic cells, pollen, leaves, roots, root tips or flowers, or protoplasts or callus derived therefrom. Also provided by the invention are soybean plants regenerated from such a tissue culture, wherein the plants are capable of expressing all the physiological and morphological characteristics of the plant variety from which the regenerable cells were obtained. A plant of these varieties may further comprise a single locus conversion. Examples of such single locus conversions include a dominant allele, a recessive allele, a single locus stably inserted into a soybean genome by transformation and a single locus comprising a single gene.

Please amend the paragraph beginning at page 41, line 13, of the Specification as follows:

A deposit of the seed of soybean variety 0007583, which has been described herein, has been made with the American Type Culture Collection (ATCC), 10801 University Blvd., Manassas, Va. 20110-2209. The date of deposit was Jan. 14, 2004. The accession number for those deposited seeds is ATCC Accession No. [[- - - -]] PTA-5764.

Please amend the paragraph beginning at page 41, line 17, of the Specification as follows:

A deposit of the seed of soybean variety 0008079, which has been described herein, has been made with the American Type Culture Collection (ATCC), 10801 University Blvd., Manassas, Va. 20110-2209. The date of deposit was May 18, 2006. The accession number for those deposited seeds is ATCC Accession No. . [[- - - -]]PTA-7601.

Please amend the Specification by adding the following paragraph after the paragraph which begins at page 41, line 17:

A deposit of the seed of soybean variety 0137335, which has been described herein, has been made with the American Type Culture Collection (ATCC), 10801 University Blvd., Manassas, VA 20110-2209. The date of deposit was Jan. 4, 2007. The accession number for those deposited seeds is ATCC Accession No. PTA-8110.
